Everbridge 360™

Know earlier, respond faster, and continuously improve how you deal with critical events.

The critical event management platform you can rely on

Everbridge 360™ simplifies critical event management with its intuitive design and powerful risk mitigation features. By streamlining emergency response, minimizing communication delays, and improving operational efficiency, it strengthens your organization's resilience like never before.

From active assailant threats to IT disruptions, Everbridge 360™ empowers you to respond quickly and with confidence – keeping your people safe, and your organization running.

Real-time communication: Share critical updates and emergency alerts quickly, enabling informed decisions and effective responses.

Enhanced employee safety: Protect employees with tools like SOS activation, location sharing, and geotargeted alerts during crises.

Operational continuity: Coordinate response teams and maintain business operations during IT outages, severe weather events, or other disruptions.

With Everbridge 360™, managing critical events is as easy as 1-2-3

1. Know earlier
Get real-time insights with advanced risk intelligence to detect threats and quickly identify risks to your people and operations.

2. Respond faster
Use "one-click" alert management for rapid emergency communications and clear instructions to keep employees safe.

3. Improve continuously
Analyze after-action reports and response data to build resilience and strengthen future outcomes.

Everbridge 360™ equips your organization with the essential tools to proactively address risks and adopt a resilient approach to risk mitigation. With Everbridge 360™, your organization becomes more agile, competitive, and profitable.

Choose the level of Everbridge 360™ that's right for you

	Core (large teams)	Professional (multiple teams)	Enterprise (global enterprises)
Your organization's need	"I need to communicate with my employees during an emergency."	"I need to know when to communicate with my employees, and fully understand any upcoming threats."	"I need to know when to communicate with my employees, understand upcoming threats, and manage risks to my business at scale."
Send messages across multiple channels to ensure everyone is reached.	✔	✔	✔
